

## March 2022 Infortel Cloud Release

March 9, 2022

### Enhancements

1. Enhanced the module security screen to eliminate non-existent modules and add consistency to module names
2. Added support for special characters in queue names for Cisco Contact Center Express reporting
3. Enhanced the web interface to no longer require the clearing of cache after software upgrades

### Fixed

1. Addressed an issue where erroneous entries were impacting license limits
2. Fixed an issue where reports were no longer able to be produced in HTML format
3. Fixed an issue where scheduled reports did not run
4. Upgraded component libraries to address known vulnerabilities
