

October 2021 Infortel Cloud Release

October 7, 2021

Highlights

The October release brings a new capability. Moving forward, new customers will have the ability to perform self-service user management. Company administrators will be able to add and remove application users without calling ISI Support for assistance. If you are an existing customer and would like to take advantage of this new feature, please contact us at support-select@isi-info.com.

ID	Work Item Type	Title
